To whom it may concern

Hull City Council (HCC) have been working with Bamford doors since 2006, in this time Bamford's have designed, manufactured and installed various solutions for many different situations and applications across the City including:-

- Full scope security solutions to high and low rise blocks of flats. Packages have included security doors, door entry & access control systems.
- Replacement doors / Asset improvement.
- Refurbishment & new build.
- On demand repairs & temporary solutions.

HCC have found that Bamford Doors have a very good understanding of social housing requirements, and can be relied upon to work well with the HCC client team, enabling them to deliver a diverse range of bespoke solutions tailored to the particular circumstances of a building, whilst still complying with DDA regulations and the client team security requirements. Bamford Doors are always competitive when quoting for works and deliver a quality final product on time with minimum fuss.

Vandalism and anti-social behavior issues are amongst the main reasons HCC raise works orders to Bamford Doors. Following installation of Bamford Doors, it is always noted that there is a drastic reduction in maintenance and that the level of vandalism to other building services such as passenger lifts and communal lighting installations drop. Through these obvious savings the security door replacement projects become self funding and often pay for themselves within the first or second year. In addition HCC Caretakers and Housing staff often report that tenants comment on how much safer the buildings feel and that the doors look very good once fitted.

Should you require any further information, please do not hesitate to contact me.

Yours Sincerely
